

Green PFM II — Feasibility Study

Mission Meeting Notes

Kigali Field Mission — May 4-9, 2026 | Consultant: Yoan Raih

INTERNAL — Not for external circulation

Bank of Kigali

Date	2026-05-07
Time	09:00-10:30
Axis	B
Counterpart attendees	Gaaga Isibo (DFI and Partnerships)
Mission team	Yoan Raih (Consultant)

Key Points

- BoK's Board approved a 3-year ESG strategy (2025-2027) with a target of 30% green portfolio by 2028. A Sustainability Manager joined two months ago. The bank is actively planning a Sustainability-Linked Bond, using the BRD SLB as its primary case study.
- BoK needs a green portfolio baseline assessment before it can meaningfully pursue the 30% target — no formal screening has been done. Rwanda Green Fund taxonomy criteria are being used as a reference point.
- IFC and British International Investment (BII) are identified as potential anchor investors for the planned SLB. BoK's existing investment portfolio is heavily weighted towards T-bills.
- BoK values DFI engagement beyond capacity building — the WB guarantee structure for BRD is cited as a model. Capacity building is valued but needs to be sustained and repetitive rather than one-off executive sessions.
- BK Insurance (a BoK group entity) is a potential entry point for the SACCO/parametric insurance axis — Nathalie (Expertise France) is in contact with its Managing Director.

Open Questions

- What TA is Climate Lends Advisors currently providing to BoK, and is there a coordination role for AFD/EF?
- Is BII's anchor investor interest in BoK's SLB formally confirmed or exploratory?
- What is the timeline for the portfolio baseline assessment before the SLB can be structured?
- How does BK Insurance fit into the broader SACCO climate insurance workstream (B2 axis)?

Potential TA Leads

Area	Description	Priority
Green portfolio baseline and SLB structuring	Support BoK in conducting a portfolio screening against the national taxonomy, then design a KPI	HIGH

	framework for SLB issuance.	
DFI engagement strategy	Map DFI guarantee and concessional funding instruments available to BoK; support engagement with IFC and BII as anchor investors.	MEDIUM
Climate risk integration in credit assessment	Support BoK in integrating climate risk into credit assessment processes, aligned with BNR's phased climate risk guidelines (implementation through end-2027).	MEDIUM

Axis B — Green Financial Products & Markets (MINECOFIN / CMA)
