

Green PFM II — Feasibility Study

Mission Meeting Notes

Kigali Field Mission — May 4-9, 2026 | Consultant: Yoan Raih

INTERNAL — Not for external circulation

Capital Market Authority (CMA)

Date	2026-05-05
Time	14:00-15:30
Axis	B
Counterpart attendees	Romeo Ngarambe (CEO, in post since 2 months) Eric Ngabonziza (Head of Market Development) Penina Uwamahoro (Legal)
Mission team	Nathalie Mutalikanwa (AFD) Yoan Raih (Consultant)

Key Points

- CMA's primary mandate is capital market development; sustainable finance is viewed as a growth vector, including through the Kigali International Financial Centre strategy for attracting impact funds. CMA has GSS+ bond guidelines in place and has contributed to the national green taxonomy (GIZ-supported).
- The taxonomy has been adopted but remains poorly appropriated by market participants — CMA notes it is not yet 'owned' by the actors who should be using it. Operationalisation is a concrete gap.
- CMA is already receiving requests from market participants for guidance on structuring green products (e.g., a transport company exploring green ABS securitisation), confirming market appetite but also a CMA capacity gap to respond systematically.
- CMA is considering whether to create a dedicated sustainability function and has explicitly requested advisory support on mandate and structure. The institution is lean (20 staff), with a newly appointed CEO.
- Current donor support: LuxDev (fund regulation), GIZ (taxonomy), AfDB (legal/regulatory, 5Y strategy), GGGI (to be confirmed). CMA expressed interest in joining NGFS-type international networks.

Open Questions

- Is GGGI's engagement with CMA confirmed, and what is its scope?
- What is the specific scope of AfDB's legal/regulatory support for the CMA 5Y strategy?
- Has the taxonomy been formally gazetted and made legally binding on capital market participants?
- What mandate, staffing, and workplan should a dedicated CMA sustainability function have?

Potential TA Leads

Area	Description	Priority
Dedicated sustainability function at CMA	Support CMA in designing the mandate, staffing, and workplan for a sustainability/green finance unit. Directly requested.	HIGH
Taxonomy operationalisation	Develop practical guidance for market participants on applying	HIGH

	Rwanda's green taxonomy to product structuring and disclosure.	
GSS+ framework review	Review existing CMA guidelines against ICMA Principles and taxonomy technical criteria; identify gaps and propose updates.	MEDIUM
Capacity building for CMA staff	Training on green product structuring, GSS+ standards, and third-party verification frameworks.	MEDIUM
