

Green PFM II — Feasibility Study

Mission Meeting Notes

Kigali Field Mission — May 4-9, 2026 | Consultant: Yoan Raih

INTERNAL — Not for external circulation

Rwanda Stock Exchange (RSE)

Date	2026-05-06
Time	09:30-11:00
Axis	B
Counterpart attendees	Pierre Celestin Rwabukumba (CEO) Alice Iribagiza (Head of Market Development)
Mission team	Nathalie Mutalikanwa (AFD) Yoan Raih (Consultant)

Key Points

- RSE has a broad and active sustainable finance agenda: own ESG reporting guidelines (GRI-based), contribution to the taxonomy, and a Green Exchange Window (LuxDev-supported) launched April 27, 2026 in partnership with the Luxembourg Stock Exchange, incorporating the ESG GPS™ AI-powered data platform.
- The ESG Data Hub — embedded in the Green Exchange Window — is RSE's centrepiece initiative: it aggregates ESG disclosures from African listed companies via ESG GPS™, providing analytics to issuers, regulators, and investors across the continent. Uptake by Rwandan market participants is the next challenge.
- RSE runs a Capital Market Investment Clinic (cohort 5 underway) to prepare SMEs and corporates for capital market access. A NextGen private market board for unquoted securities has 6 companies, 4 of which have already raised capital — some via green bonds.
- The regulatory framework is in transition: the Capital Markets Act is under review, and the RSE rulebook (which predates the Act) will need realignment. RSE holds the status of Recognised Securities Organisation (RSO).
- RSE's internal research identifies approximately 92 potential issuers for capital market products — a concrete pipeline entry point for green bond market development work.

Open Questions

- What is the expected timeline for the Capital Markets Act review and the RSE rulebook realignment?
- Does the ESG GPS™ platform cover Rwanda's full taxonomy criteria, or only GRI-aligned metrics?
- How does RSE plan to sequence outreach to its 92 potential issuers for green instruments?
- Is GGGI's support to the Financial Services High Council confirmed, and how does it coordinate with RSE?

Potential TA Leads

Area	Description	Priority
ESG Data Hub operationalisation (B3.2)	Support RSE in defining data governance, taxonomy mapping, and	HIGH

	domestic issuer uptake strategy for the ESG GPS™ platform.	
Investment readiness for green issuers	Expand the Investment Clinic model to specifically target green/sustainable issuers, linked to the CMA GSS+ guidelines.	MEDIUM
Regulatory alignment support	Support alignment of the RSE rulebook with the updated Capital Markets Act and international sustainability standards (ICMA, IFRS S1/S2).	MEDIUM

Axis B — Green Financial Products & Markets (MINECOFIN / CMA)
