

Green PFM II — Feasibility Study

Mission Meeting Notes

Kigali Field Mission — May 4-9, 2026 | Consultant: Yoan Raih

INTERNAL — Not for external circulation

BNR — Financial Markets Department

Date	2026-05-05
Time	10:00-11:30
Axis	A
Counterpart attendees	Boniface Mutabazi (Director, Financial Markets) Jean-Marie Rugambwa (Manager, Domestic Debt Market Development) Eugene ?? (Portfolio Manager) Jean Yves ?? (Portfolio Manager)
Mission team	Yoan Raih (Consultant) Emmanuel Carrère (Consultant) Marilou Rouja-Vandenbrouck (Expertise France)

Key Points

- The department has two mandates: domestic government securities issuance (as BNR's agent for MINECOFIN) and foreign reserves management. Decisions on introducing green products in either function require MINECOFIN approval (domestic) or Board-level approval (reserves).
- On reserves management: the investment policy prioritises safety > liquidity > return, with a sovereign-heavy portfolio. The team has a positive reaction to having the portfolio's carbon footprint assessed as a concrete entry point for a greening strategy — but expects the process to be gradual.
- World Bank RAMP and BIS (as fund manager) are the main external partners on reserves. Neither has provided formal TA on sustainability integration. BNR has no engagement with Banque de France / IBFI on this topic.
- BNR is involved in the BRD SLB via a collateral/guarantee agreement, giving the department first-hand exposure to sustainability-linked instrument structuring. Positive signal for further domestic green product development.
- Capacity building is the primary ask: the team believes a well-structured sustainability strategy could over time convince the Board to shift portfolio allocation, but a carbon footprint baseline is needed first.

Open Questions

- Is MINECOFIN (DG Debt) aligned on the ambition to develop green domestic securities, and at what pace?
- Has the World Bank RAMP engagement on green bonds produced any concrete recommendation or roadmap?
- Could BIS, as fund manager, be formally engaged on sustainability guidelines for the reserves portfolio?
- What is the timeline for any Board-level discussion on portfolio greening?

Potential TA Leads

Area	Description	Priority
------	-------------	----------

Carbon footprint baseline for reserves portfolio	Assess the carbon intensity of BNR's reserve portfolio as a first step toward a greening strategy, using NGFS methodology.	HIGH
Investment policy update	Support development of an investment policy statement incorporating sustainability criteria, aligned with NGFS guidance on central bank reserve management.	MEDIUM
Capacity building — reserve portfolio greening	Targeted training for portfolio managers leveraging NGFS technical documents and BdF/IBFI expertise.	MEDIUM

Axis B — Green Financial Products & Markets (MINECOFIN / CMA)
